

# ALUMINUM

## MODEL: D700-2 Series

### STYLE: FLAT D-RUNG EXTENSION LADDER

#### LOAD CAPACITY

**200 lbs.**

Combined weight of user and materials.

Light Duty/Household Use

**TYPE III**

DUTY RATING

**Exclusive Alflo® rung joint means Twist-Proof® performance**

Model D716-2

#### SPECIFICATIONS

Model No.	Total Length Sections	Maximum Working Length	Approx. Cu. Ft. Per Unit	Approx. Shipping Wt. Lbs.
<b>D716-2</b>	16'	13'	4.6	17.0

#### DIMENSIONS

Rails: 2-1/2" wide  
 Flange: 3/4" wide  
 Rungs: 1-1/4"  
 Base Section Width: 15-3/4" outside rails

## MODEL: D1100-2 Series

### STYLE: FLAT D-RUNG EXTENSION LADDER

#### LOAD CAPACITY

**200 lbs.**

Combined weight of user and materials.

Light Duty/Household Use

**TYPE III**

DUTY RATING

**Exclusive Alflo® rung joint means Twist-Proof® performance**

Model D1120-2

#### SPECIFICATIONS

Model No.	Total Length Sections	Maximum Working Length	Approx. Cu. Ft. Per Unit	Approx. Shipping Wt. Lbs.
<b>D1116-2†</b>	16'	13'	4.9	17.5
<b>D1120-2</b>	20'	17'	6.2	22.0
<b>D1124-2</b>	24'	21'	7.4	30.0
<b>D1128-2</b>	28'	25'	9.0	38.0
<b>D1132-2</b>	32'	29'	10.9	51.0

† Note: D1116-2 is not equipped with rope and pulley

#### DIMENSIONS

Rails: 2-3/4" wide (16' & 20')  
 3" wide (24' to 32')  
 Flange: 15/16" wide  
 Rungs: 1-1/2"  
 Base Width: 16" outside rails

# and distributor of climbing equipment

## Aluminum

We start by melting commercially pure aluminum and add other select elements to cast our own unique aluminum alloys which are specifically formulated for climbing products. This aluminum is then extruded to create aluminum sections that are fabricated into side rails, steps, rungs and other components.

## Wood

We manufacture wood ladders using select grades of clear southern yellow pine boards and hardwoods. Modern, computer aided design and manufacturing techniques are used to create consistently high quality products. Attention to design elements such as eased edges and rodded steps provide a superior quality wood ladder.

## History of Technological Development

For over 75 years, the Werner name has stood for high quality and superior customer service. With over 130 worldwide patents, as well as ISO 9002 certification, the Company's creativity, vision and innovation are world renown. Our innovation has led to a number of key developments in the ladder category.

While all Werner ladders contain unique features designed to enhance your productivity, one reason professionals prefer

Werner ladders over any other brand is our exclusive ALFLO® 3 piece Twist-Proof® rung joint. This revolutionary development is used to create extension ladders that are up to five times stronger than code requirements. Heat hardened seamless extruded rungs are mechanically locked to the rails using a unique aluminum connector.

This feature adds rigidity and means Twist-Proof® performance for all Werner extension ladders.

## Pro's know Werner, use Werner and prefer Werner!

Werner is the professionals' ladder of choice and the brand that consumers know and want.

### Brand Awareness

*Professionals have extremely strong top of mind awareness of the Werner brand.*

### Brand Preference

*Professionals prefer Werner ladders 2 to 1 over other ladder brands*

### Product Performance

*Werner performs well on product attributes that are important to professionals*

Source: Caney Research 1997

We are committed to delighting customers by exceeding their expectations. We are dedicated to designing, manufacturing and distributing quality products utilizing technical capabilities and providing superior customer service. Customer trust and confidence in Werner products and services are a top priority.

# Product Certifications

## AMERICAN NATIONAL STANDARDS INSTITUTE

### PRODUCT LINES MEET OR EXCEED ANSI CODE

Fiberglass Ladders	A14.5 (1992)
Aluminum Ladders	A14.2 (1990)
Wood Ladders	A14.1 (1994)
Ladder Jacks	A10.8 (1988)
Extension Planks	A10.8 (1988)

## OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION CODE

All Type II, I and IA fiberglass, aluminum and wood ladders, ladder jacks and extension planks meet or exceed code. OSHA CODE applies to ladders used in the workplace. Werner Ladder Co. recommends Type II or heavier duty rated ladders for these applications.

## UNDERWRITERS LABORATORY CODE

### SERIES COMPLY WITH U.L. STANDARDS AS NOTED:

Aluminum Ladders	.....All Series
Ladder Jacks	.....All Series
Aluminum Extension Planks	.....All Series
Fiberglass Ladders	.....NO U.L. STANDARDS

NOTE: No ANSI, OSHA or U.L. Standards have been written for attic ladders for overhead access.

All Werner fiberglass ladders have electrically non-conductive rails. This is a great benefit for those working near electricity. Fiberglass rails also maintain a smooth surface even after weathering.

Werner ladders are proudly made in U.S.A.
